

MBONU AMARA

Data Analyst | Excel | SQL | Python

Lagos, Nigeria | 09066418932 | mbonuamara123@gmail.com

Portfolio: amara-analytics.carrd.co

GitHub: github.com/mbonuamara

PROFESSIONAL SUMMARY

Analytical and detail-oriented Data Analyst with hands-on experience in Excel, SQL, and Python through practical data projects and self-directed learning. Skilled in data cleaning, data transformation, spreadsheet reporting, data validation, and data visualization.

Demonstrated ability to work with large datasets, identify inconsistencies, improve data quality, and generate actionable insights. Experienced in transforming raw data into structured, analysis-ready information through portfolio projects involving Excel, SQL querying, and Python-based data processing.

Strong problem-solving, organizational, and communication skills with a commitment to continuous learning and delivering accurate results. Open to opportunities in Data Analysis, Data Entry, Reporting Support, Operations Support, Administrative Support, and Virtual Assistance.

TECHNICAL SKILLS

Data Analysis

- Data Cleaning
- Data Validation

- Data Transformation
- Data Categorization
- Data Reporting
- Data Visualization
- Exploratory Data Analysis

Microsoft Excel & Google Sheets

- IF
- SUMIF
- COUNTIF
- VLOOKUP
- AVERAGE
- PROPER
- Pivot Tables
- Charts & Graphs
- Spreadsheet Management
- Data Formatting

- SQL
- SELECT
- WHERE
- GROUP BY
- ORDER BY
- COUNT
- SUM
- AVG
- Data Retrieval
- Data Aggregation

Python

- Variables
- Data Types
- Loops
- Conditional Statements
- Data Processing

- Data Summarization
- Tools & Platforms
- GitHub
- Google Workspace
- Microsoft Office
- Carrd
- SoloLearn

PORTFOLIO PROJECTS

Employee Health Data Cleaning Project (Excel)

GitHub: github.com/mbonuamara/Data-Analysis-Portfolio

- Cleaned and transformed a dataset containing over 10,000 employee health records.
- Corrected missing and inconsistent values across multiple fields.
- Utilized IF and AVERAGE functions to improve data completeness and accuracy.
- Standardized department names using PROPER() to improve consistency.

- Created employee risk categories including “Overloaded” and “High Risk” based on workload and stress indicators.
- Delivered a clean, structured dataset suitable for reporting and analysis.

Customer Database Analysis (SQL)

GitHub:

github.com/mbonuamara/Data-Analysis-Portfolio/tree/main/SQL_Project

- Developed SQL queries to analyze customer and order data.
- Retrieved customer information using filtering and sorting techniques.
- Counted customers by country using aggregate functions.
- Analyzed recent orders and customer activity patterns.
- Demonstrated practical use of SQL for business data analysis.

Employee Health Data Summary (Python)

GitHub:

github.com/mbonuamara/Data-Analysis-Portfolio/tree/main/Python_Project

- Developed a Python script to summarize employee demographic information.

- Calculated average age and identified youngest and oldest employees.
- Applied loops, variables, and conditional logic to process data efficiently.
- Generated summary statistics to support data-driven insights.

EDUCATION

Bachelor's Degree

Educational Management & Policy (Economics Option)

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

SoloLearn

- Introduction to SQL
- Python Basics

Ongoing Learning

- Google Data Analytics Professional Certificate (In Progress)
- Data Analysis
- Advanced Excel
- SQL for Data Analytics

CORE COMPETENCIES

- Attention to Detail
- Analytical Thinking
- Problem Solving
- Communication Skills
- Time Management
- Documentation
- Data Organization
- Independent Learning
- Research Skills

ADDITIONAL INFORMATION

- Remote-work ready
- Comfortable working independently and collaboratively
- Available for full-time, part-time, contract, internship, and freelance opportunities
- Open to roles in Data Analysis, Data Entry, Reporting Support, Operations Support, Administrative Support, Customer Support, and Virtual Assistance.
